

## Answers To the Bubble Rush Quiz

1. True, as bubbles that form naturally are always circular, though you can force bubbles into many other shapes.
2. Bubbleology.
3. No, as there is no air which creates pressure against the inside of the bubble. The pressure created by the air is needed for the bubble to form.
4. Reflection of light.
5. Evaporation of water from the bubble 'shell' or disruption of the bubble shell with objects such as fingers!
6. True – it holds the water together better.
7. Because they pop so fast, so you would have to change the temperature very quickly!
8. Bubbles put at the bottom of drinks that pop to release flavours, creating 'bubble tea'.
9. True.
10. 19.
11. 14 000.
12. Pistol Shot.
13. True, so is most foam, including from the sea.
14. 400 years ago.
15. Chicago.
